

Laura Mateyka

PhD Program "Medical Life Science and Technology"

Group AG Busch – Institute for Medical Microbiology, Immunology and Hygiene

Education B.Sc. Molecular Biotechnology, M.Sc. Biochemistry

PhD Project Identification and characterization of SARS-CoV-2-specific T cell receptors of CD8+ T cells

Motivation I am running for the position of representation of the PhD Executive Committee because I would like to actively engage in the official parts of the program as well as the social activities.

After more than two year of pandemic, one of my focuses for the students will be to increase the interaction between PhD Students in the program but also interconnect with other programs. I would like to do this by organizing a PhD retreat as well as reviving the joint PhD/Dr.rer.nat. 'Stammtisch'.

In addition, I am interested to hear concerns or suggestions you may have to help improve the program.

Hobbies In my free time I enjoy outdoor sports such as hiking, climbing and skiing as well as spending time with friends for dinner or a glass of wine.
