

**Guidelines for the evaluation of the dissertation for the doctoral programs Experimental Medicine and Translational Medicine, and the medical doctoral programs Dr.med. and Dr.med.dent., based on the Regulations for the Award of Doctoral Degrees of the Technical University of Munich effective January 1, 2014 and the Decision of the Faculty Council of the School of Medicine of March 27, 2019.**

Evaluation	Earlier grading for comparison*	Criteria
<b>Mit Auszeichnung bestanden (summa cum laude)</b>	1,0	The quality of the dissertation content is assessed by taking into account the central aspects of the scientific performance. These include: originality, innovation, relevance, scope of scientific achievements, scientific independence, quality and significance of the control tests. In these aspects, the performance must be predominantly very good to outstanding. Additionally, at least one original paper, with the doctoral candidate as first author, must have been accepted for publication in an English-language peer-reviewed journal.
<b>Mit Erfolg bestanden</b>	1,3 – 4,0	The quality of the dissertation content is assessed by taking into account the central aspects of the scientific performance. These include: originality, innovation, relevance, scope of scientific achievements, scientific independence, quality and significance of the control tests. In these aspects, the performance must be predominantly good to sufficient. An independent scientific work with a knowledge gain is a prerequisite for passing.
<b>Nicht bestanden</b>	4,3 – 5,0	Poor scientific performance.
